

## MEMORANDUM

**To: Residential Haulers**  
**From: The Darien Transfer Station Advisory Committee (TSAC)**  
**Date: March 26, 2013**  
**Re: Update on Residential Single Stream:**

We appreciate the time, willingness, and participation of each of the Town's Residential Haulers in assisting the TSAC. Our research and our conversations with you have highlighted common elements of successful Single Stream Recycling programs directly related to the work of residential haulers: 1) customer education; 2) an appropriately sized and labeled bin or tote with a top; and 3) separate day pick-up of recycling and municipal solid waste.

To assist with customer education we are providing you with a digital copy of the detailed Single Stream Recycling insert for distribution to your customers. We ask that you coordinate with your customers so they have a recycling bin or tote that works with your system and can handle the amount of recycling generated by each household.

The standard pickup in Greenwich, Stamford and Westport is once a week for garbage and once a week for single stream. This standard has worked well for our neighboring towns. TSAC supports this change as an efficient and effective way for the Darien hauling companies to pick up the increased volume of recycling and the reduced quantity of waste. We are gratified that the Darien haulers want to help make single stream easy for our residents, and that all of you are encouraging your customers to call with any questions, comments or concerns.

We, the TSAC, offer our support of your endeavors to help fully realize the potential of Single Stream Recycling.
